Start at uniform $\theta = 0$; voxel FE, 64^3 (1 query)
Frozen local-thickness score ranks 9 trials
Select top non-incumbent trial $\rightarrow \theta'$
Voxel FE of the proposal, 64^3 (1 query)
FE C_{1111} above FE incumbent?
No
Yes
Retain incumbent
Update incumbent ($\theta \leftarrow \theta'$)
All 24 checkpoints done?
No: next checkpoint
Yes
Re-evaluate incumbent, 96^3 (1 query)
Return design; FE gain over uniform at 64^3 and 96^3
