(a) exploratory ten-seed comparison (one trained network)
mean difference +1.33 pp
bootstrap 95%: [0.40, 2.23]
mean difference +1.22 pp
bootstrap 95%: [0.27, 2.15]
FE gain over uniform at end of search [%]
seeds 11–13, fixed before the runs
seeds 14–20, exploratory extension
mean of ten seeds
filtered
random
filtered
random
64^3 (search grid)
96^3 (re-evaluation)
(b) empirical distribution of endpoints
lowest filtered endpoint
(6/10 random endpoints below, 96^3)
fraction of seeds ≤ gain
filtered search
random proposals
96^3
64^3
FE gain over uniform at end of search [%]
